UNSWORN DECLARATION MADE UNDER 28 U.S.C. § 1746

I, FRANCINE AROCHO, of legal age, engineer, and resident of San Juan, Puerto Rico, hereby declare under penalty of perjury under the laws of the United States of America that the following account is true and correct based on my personal familiarity with the documents, obligations, and contracts between Canopy Ecoterra and CEMEX.

1. I was employed as an engineer by AWMR for the dismantling of the CEMEX plant in Ponce, P. R.
2. I began working at the CEMEX site in February 2007.
3. Several field reports were submitted to CEMEX and Ecoterra, dated April 26 and June 18, 2007, respectively, regarding problems with the site.
4. I attended meetings with the CEMEX department heads on a daily basis.
5. Mr Barsotelli, on more than one occasion, made inappropriate suggestions to me, which I reported to AWMR attorneys.
6. Mr Barsotelli also informed me that he had a very close relationship with CEMEX personnel and managers, that he entertained them at his house and that he could get anything done through them.
7. I found an asbestos company to work with AWMR to abate the asbestos at the Ponce plant, per CEMEX' request that we contract to clean up the asbestos at the site.
8. After AWMR had put the proposal together, Ecoterra hijacked it and presented it as their own.
9. On various occasions, CEMEX asked AWMR engineers to work in assisting them outside the original work plan.

10. Metal was cut for CEMEX, which was subsequently unable to be removed from the site after AWMR personnel was thrown out of the site.

11. At the end of June, Mr,. Emmanuelli and CEMEX security wanted us escorted out of the site, which we refused to do and thus left without escort.

12. I informed Mr. Shah of AWMR of this development over the telephone, since containers leased by AWMR scheduled for delivery to port were detained and held by CEMEX.

13. Trucks had already been dispatched to pick up the loads, and were forced to leave the site with no cargo.

14. Mr. Arthur Mitchell, myself and a few other employees were removed from the site.

15. Mr Shah requested that CEMEX allow us to leave one person behind for security and safety reasons, but his request was denied.

16. Mr. Barsotelli, on more than one occasion, asked Mr. Jose Arzón and me to give him copper wires belonging to AWMR.

17. When we refused to do so, he became agitated and slammed the office trailer door.

18. On more than one occasion, CEMEX plant managers told us we were doing an excellent job, that they were pleased with out work performance, and that they would like us to finish dismantling the plant.

Executed under penalty of perjury this 23rd day of July, 2007 in San Juan, Puerto Rico.

FRANCINE AROCHO
AWMR on-site Engineer
